## Exhibit 8

## There Has Been a Modest Reduction in Reports of Medical Bill Problems

 by WomenPercent of women ages 19-64 who reported any of following bill or medical debt problems in the past year:

| Had problems paying or unable <br> to pay medical bills | $26 \%$ | $34 \%$ | $34 \%$ | $27 \%$ | $26 \%$ |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Contacted by a collection agency <br> for unpaid medical bills | $16 \%$ | $19 \%$ | $22 \%$ | $18 \%$ | $16 \%$ |
| Had to change way of life to pay bills | $15 \%$ | $19 \%$ | $19 \%$ | $17 \%$ | $15 \%$ |
| Medical bills/debt being paid off <br> over time | $24 \%$ | $27 \%$ | $31 \%$ | $23 \%$ | $28 \%$ |
| Any of the above | $38 \%$ | $44 \%$ | $47 \%$ | $38 \%$ | $42 \%$ |

## Exhibit

## Insured Women Are More Likely to Receive Cancer Screenings Than Uninsured Women, 2016

Percent of women

- Continuously insured

■ Insured now, had a gap

- Uninsured now

Received Pap test

Received mammogram

Notes: "Continuously insured" refers to adults who were insured for the full year up to and on the survey field date; "Insured now, had a gap" refers to adults who were insured at the time of the survey but were uninsured at any point during the year before the survey field date; "Uninsured now" refers to women who reported being uninsured at the time of the survey. Respondents were asked if they: received a Pap test within the past three years for females ages 21-64 and received a mammogram within the past two years for females ages 40-64. Data: The Commonwealth Fund Biennial Health Insurance Survey (2016).
