Multinational Comparisons of Health Systems Data, 2019

Roosa Tikkanen
The Commonwealth Fund
Health Care Spending as a Percent of GDP, 1980–2018

Adjusted for Differences in Cost of Living

Notes: Current expenditures on health. Based on System of Health Accounts methodology, with some differences between country methodologies. OECD average reflects the average of 36 OECD member countries, including ones not shown here.

*2018 data are provisional or estimated.

Health Care Spending per Capita by Source of Funding, 2018

Adjusted for Differences in Cost of Living

Data reflect current expenditures on health per capita, adjusted using US$ purchasing power parities (PPPs), for 2018 or the most recent year: 2017 for FRA, SWIZ, UK, US; 2016 for AUS. Data for 2018 reflect estimated/provisional values. Numbers may not sum to total due to excluding capital formation of health care providers, and some uncategorized health care spending. Public spending reflects government and compulsory spending (HF1); private reflects voluntary schemes (HF2); out-of-pocket (HF3).* For the US, ‘Compulsory private insurance schemes’ (HF122) spending was reclassified into the ‘Voluntary health insurance schemes’ (HF21) category, given that the individual mandate to have health insurance ended in Jan 2019. OECD average reflects the average of 36 OECD member countries, including ones not shown here. Source: OECD Health Data 2019.
OECD average reflects the average of 36 OECD member countries, including ones not shown here.
