

**BACKGROUND** Adding work requirements to Medicaid through Section 1115 waivers is likely to reduce the number of people with Medicaid coverage. It can also harm the financial viability of some hospitals by reducing their Medicaid revenues and increasing uncompensated care costs, resulting in lower operating margins.

Montana’s 1115 Medicaid waiver is pending approval (as of January 2020) from the U.S. Department of Health and Human Services. The application includes a provision for implementing work requirements for the Medicaid population that become eligible through the Affordable Care Act’s Medicaid expansion and who are between ages 18 and 55.

**ENROLLMENT IMPACT** We estimate 16,000 to 21,000 current Medicaid enrollees could lose coverage.<sup>1</sup>

**ESTIMATED REDUCTION IN MEDICAID REVENUE** Montana hospitals will receive \$10.3 million in Medicaid revenues per hospital in 2019. Assuming statewide implementation of work requirements, we estimate the average Montana hospital’s Medicaid revenues will decline \$800,000 to \$1.0 million (7%–9%) in 2019.

**INCREASE IN UNCOMPENSATED CARE COSTS** Montana hospitals will provide \$1.8 million in uncompensated care costs per hospital in 2019. Assuming statewide implementation of Medicaid work requirements, we estimate the average Montana hospital’s uncompensated care costs will increase \$400,000 to \$600,000 (21%–36%) in 2019.

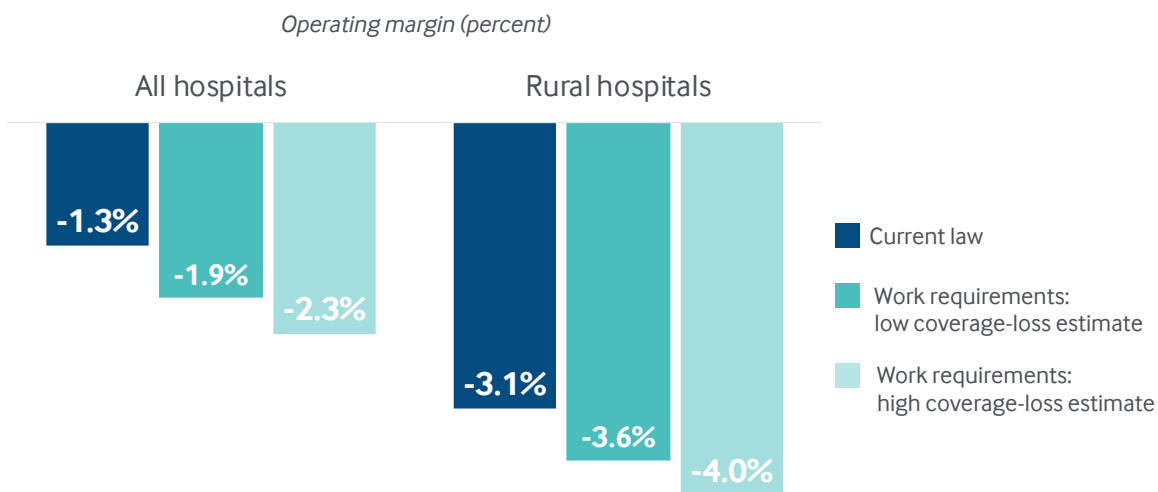

## Estimated Impact of Work Requirements on Medicaid Revenue and Uncompensated Care Costs per Hospital, 2019

**REDUCTION IN HOSPITAL OPERATING MARGIN** Operating margins for Montana hospitals in 2019 will be  $-1.3\%$ , on average, without Medicaid work requirements. Work requirements will reduce operating margins to between  $-1.9\%$  and  $-2.3\%$  assuming statewide implementation in 2019. Rural hospitals in Montana will have a  $-3.1\%$  margin, which could further decline to between  $-3.6\%$  and  $-4.0\%$  upon implementation of work requirements.

## Estimated Impact of Work Requirements on Hospital Operating Margins, 2019

**DISCUSSION** Medicaid work requirements could undo some of the benefits realized by hospitals from Medicaid expansion and weaken hospitals' financial position, affecting not only hospitals and Medicaid patients but their surrounding communities.<sup>2</sup> The impact may be especially severe in rural communities. Many rural hospitals already experience negative operating margins, and 12 rural hospitals in Montana are currently at high financial risk of closing.<sup>3</sup> The increased pressure of further reducing Medicaid revenue and increasing uncompensated care could exacerbate closures.

The effects of closing a hospital can ripple through the community. The economic effects are felt immediately, with per capita income falling and unemployment rising.<sup>4</sup>
