Protecting loved ones, supporting local businesses, and restoring social gatherings are among the most popular messages among unvaccinated respondents.

Percentage of unvaccinated respondents who are much more/more likely to get the vaccine because it will . . .

- Protect the lives of my family, friends, and those I love (44%)
- Help open up businesses here in my state and help our economy rebound quickly (36%)
- Stop children from losing a parent to COVID-19 (37%)
- Allow the return of safe family occasions like birthday parties, celebrations, and holiday get-togethers (37%)
- Help save elders in my community who have valuable culture knowledge and help preserve our Native language (34%)
Nearly a third of parents say they will not sign up their child for a COVID-19 vaccination when it becomes available.

Among parents or primary caregivers of a child 18 years old or younger (n=3,232)

- 41% Yes, will sign up my child for the vaccine
- 30% No, will not sign up my child
- 22% Don’t know/It depends

Parents’ concerns about signing up their child for the COVID-19 vaccine largely rest on the safety of the vaccine for children.

Top reasons for not planning to sign up child for a vaccine, among parents and primary caregivers who say they won’t (n=757)

- Not enough research has been done with children to ensure the vaccine is safe for kids: 55%
- Concerned about the side effects the vaccine may have on my child: 40%
- Think a COVID-19 vaccine might cause lasting health problems for my child: 40%
