

How well does the health care system in **New York** work for people of different racial and ethnic groups?

In New York, **White people** experienced the **highest health system performance**, scoring in the 89th percentile among all population groups nationally.

Black people experienced the **lowest health system performance** in the state, scoring in the 52nd percentile.

Compared to other states in the Mid-Atlantic region, New York has less severe racial and ethnic health disparities.

Health System Performance by Race/Ethnicity

Each column is a racial/ethnic group, and each point represents a state. Performance represented as percentiles (1–100). New York performance percentile highlighted. No highlighted dot indicates overall performance data not available for that group.

Population by race/ethnicity (2022)

	New York	Mid-Atlantic	United States
Total	19,478,850	49,181,530	328,403,052
AANHPI	1,782,559 (9%)	3,666,659 (7%)	19,862,655 (6%)
AIAN	34,387 (<1%)	62,567 (<1%)	1,688,543 (<1%)
Black	2,583,886 (13%)	7,182,586 (15%)	38,460,950 (12%)
Hispanic	3,836,256 (20%)	7,835,704 (16%)	62,818,758 (19%)
White	10,308,153 (53%)	28,088,728 (57%)	189,511,136 (58%)

Notes: AANHPI = Asian American, Native Hawaiian, and Pacific Islander. AIAN = American Indian and Alaska Native. “—” means data not available. Mid-Atlantic states include DE, DC, MD, NJ, NY, PA. How well does the health system in New York work for people from different racial and ethnic groups, and across different dimensions of care?

AANHPI

New York ranks 12th of 31 states where calculation was possible, indicating health system performance for AANHPI people in the state was better than average compared to other states. Specifically:

- Health outcomes ranking: **7** (of 33) is better than average
- Health care access ranking: **8** (of 34) is better than average
- Health care quality ranking: **29** (of 41) is worse than average

AIAN

An overall ranking for AIAN people in New York is not available because of insufficient data.

- Health outcomes ranking: insufficient data
- Health care access ranking: insufficient data
- Health care quality ranking: insufficient data

Black

New York ranks 6th of 39 states where calculation was possible, indicating health system performance for Black people in the state was better than average compared to other states. Specifically:

- Health outcomes ranking: **7** (of 40) is better than average
- Health care access ranking: **9** (of 40) is better than average
- Health care quality ranking: **15** (of 41) is better than average

Hispanic

New York ranks 9th of 47 states where calculation was possible, indicating health system performance for Hispanic people in the state was better than average compared to other states. Specifically:

- Health outcomes ranking: **16** (of 49) is better than average
- Health care access ranking: **11** (of 48) is better than average
- Health care quality ranking: **16** (of 48) is better than average

White

New York ranks 11th of 51 states where calculation was possible, indicating health system performance for white people in the state was better than average compared to other states. Specifically:

- Health outcomes ranking: **15** (of 51) is better than average
- Health care access ranking: **10** (of 51) is better than average
- Health care quality ranking: **20** (of 51) is better than average
