

# How well does the health care system in Arizona work for people of different racial and ethnic groups?

In Arizona, **AANHPI people** experienced the **best health care outcomes, access, and quality**, scoring in the 78th percentile among all population groups nationally.

**AIAN people** experienced the **worst health care outcomes, access, and quality** in the state, scoring in the 2nd percentile.

Compared to other states in the Southwest region, Arizona has **more severe** racial and ethnic health disparities.

## Health System Performance by Race/Ethnicity

Each column is a racial/ethnic group, and each point represents a state. Performance represented as percentiles (1–100). Arizona performance percentile highlighted. No highlighted dot indicates overall performance data not available for that group.

## Population by race/ethnicity (2024)

|          | Arizona   |     | Southwest  |     | United States |     |
|----------|-----------|-----|------------|-----|---------------|-----|
| Total    | 7,474,348 |     | 44,385,907 |     | 335,268,606   |     |
| AANHPI   | 296,051   | 4%  | 2,345,220  | 5%  | 21,483,845    | 6%  |
| AIAN     | 228,738   | 3%  | 725,337    | 2%  | 1,720,874     | <1% |
| Black    | 325,814   | 4%  | 4,250,565  | 10% | 38,820,084    | 12% |
| Hispanic | 2,404,159 | 32% | 16,429,756 | 37% | 67,230,087    | 20% |
| White    | 3,830,553 | 51% | 18,651,175 | 42% | 188,863,832   | 56% |

Notes: AANHPI = Asian American, Native Hawaiian, and Pacific Islander. AIAN = American Indian and Alaska Native. “—” means data not available. Southwest states include AZ, NM, OK, TX.

# How well does the health system in Arizona work for people from different racial and ethnic groups and across different dimensions of care?

## AANHPI

Arizona ranks 18th among the 33 states we were able to rank. This indicates that the state's health system performance for AANHPI people was worse than the average compared to other states.

- Health outcomes ranking: **24** (of 36) is worse than the average
- Health care access ranking: **15** (of 36) is better than the average
- Health care quality ranking: **31** (of 45) is worse than the average

## AIAN

Arizona ranks 19th among the 21 states we were able to rank. This indicates that the state's health system performance for AIAN people was among the worst compared to other states.

- Health outcomes ranking: **10** (of 23) is better than the average
- Health care access ranking: **20** (of 21) is among the worst
- Health care quality ranking: **23** (of 25) is among the worst

## Black

Arizona ranks 18th among the 39 states we were able to rank. This indicates that the state's health system performance for Black people was better than the average compared to other states.

- Health outcomes ranking: **8** (of 41) is better than the average
- Health care access ranking: **37** (of 41) is among the worst
- Health care quality ranking: **7** (of 45) is better than the average

## Hispanic

Arizona ranks 22nd among the 49 states we were able to rank. This indicates that health system performance for Hispanic people was better than the average compared to other states.

- Health outcomes ranking: **45** (of 50) is among the worst
- Health care access ranking: **20** (of 50) is better than the average
- Health care quality ranking: **19** (of 50) is better than the average

## White

Arizona ranks 30th among the 51 states we were able to rank. This indicates that the health system performance for white people was worse than the average compared to other states.

- Health outcomes ranking: **21** (of 51) is better than the average
- Health care access ranking: **38** (of 51) is worse than the average
- Health care quality ranking: **27** (of 51) is worse than the average

Notes: Lower values indicate higher rank and better performance among each racial/ethnic group in Arizona compared to other states. Performance data not available for all groups in every state.
