

How well does the health care system in Vermont work for people of different racial and ethnic groups?

In Vermont, **White people** experienced the **best health care outcomes, access, and quality**, scoring in the 91st percentile among all population groups nationally.

White people experienced the **worst health care outcomes, access, and quality** in the state, scoring in the 91st percentile.

Compared to other states in the New England region, Vermont has **less severe** racial and ethnic health disparities.

Health System Performance by Race/Ethnicity

Each column is a racial/ethnic group, and each point represents a state. Performance represented as percentiles (1–100). Vermont performance percentile highlighted. No highlighted dot indicates overall performance data not available for that group.

Population by race/ethnicity (2024)

	Vermont		New England		United States	
Total	642,168		15,221,671		335,268,606	
AANHPI	13,376	2%	831,344	5%	21,483,845	6%
AIAN	239	<1%	17,022	<1%	1,720,874	<1%
Black	4,167	<1%	894,319	6%	38,820,084	12%
Hispanic	17,437	3%	2,017,314	13%	67,230,087	20%
White	574,361	89%	10,523,013	69%	188,863,832	56%

Notes: AANHPI = Asian American, Native Hawaiian, and Pacific Islander. AIAN = American Indian and Alaska Native. “—” means data not available. New England states include CT, ME, MA, NH, RI, VT.

How well does the health system in Vermont work for people from different racial and ethnic groups and across different dimensions of care?

AANHPI

An overall ranking for AANHPI people in Vermont is not available because of insufficient data.

Health outcomes ranking:	insufficient data
Health care access ranking:	insufficient data
Health care quality ranking:	45 (of 45) is among the worst

AIAN

An overall ranking for AIAN people in Vermont is not available because of insufficient data.

Health outcomes ranking:	insufficient data
Health care access ranking:	insufficient data
Health care quality ranking:	insufficient data

Black

An overall ranking for Black people in Vermont is not available because of insufficient data.

Health outcomes ranking:	insufficient data
Health care access ranking:	insufficient data
Health care quality ranking:	insufficient data

Hispanic

An overall ranking for Hispanic people in Vermont is not available because of insufficient data.

Health outcomes ranking:	insufficient data
Health care access ranking:	insufficient data
Health care quality ranking:	1 (of 50) is among the best

White

Vermont ranks 11th among the 51 states we were able to rank. This indicates that the health system performance for white people was better than the average compared to other states.

Health outcomes ranking:	17 (of 51) is better than the average
Health care access ranking:	12 (of 51) is better than the average
Health care quality ranking:	10 (of 51) is better than the average

Notes: Lower values indicate higher rank and better performance among each racial/ethnic group in Vermont compared to other states. Performance data not available for all groups in every state.
