

Huntington, WV

Ranking Summary (of 306 Local Areas)	2016 Scorecard		2012 Scorecard (Rev.) ^a	
	Quintile	Rank	Quintile	Rank
OVERALL	5	257	5	272
Access & Affordability	4	208	4	228
Prevention & Treatment	3	151	4	197
Avoidable Hospital Use & Cost	5	282	5	270
Healthy Lives	5	299	5	301

Change in Performance ^c	2016 Scorecard	
	count	percent
Indicators with trends	32	100%
Area rate improved	14	44%
Area rate worsened	2	6%
Little or no change in area rate	16	50%

Percentage of Indicators This Area Ranked in the:	2016 Scorecard	
	count	percent
Total indicators	35	100%
Top 10th percentile	4	11%
Top quintile	5	14%
2nd quintile	4	11%
3rd quintile	6	17%
4th quintile	2	6%
Bottom quintile	18	51%
Bottom 10th percentile	13	37%

Demographic Characteristics ^b	Huntington, WV	U.S. Average
Total Population	349,137	313,922,028
Median Household Income	\$40,404	\$58,489
Below 200% of Federal Poverty Level (FPL)	43%	34%
200% to 399% of FPL	34%	30%
400% of FPL or higher	24%	36%
% White Race, Non-Hispanic	94%	62%
% Black Race, Non-Hispanic	3%	12%
% Other Race, Non-Hispanic	2%	8%
% Hispanic Ethnicity	1%	17%

Estimated Impact of Local Improvement ^d	
If Huntington, WV improved its performance to the level of the best-performing local area for this indicator, then:	
14,615	more adults (ages 19–64) would be covered by health insurance (public or private), and therefore would be more likely to receive health care when needed
32,267	more adults (age 18 and older) would have a usual source of care to help ensure that care is coordinated and accessible when needed
24,444	more adults would receive age and gender appropriate recommended preventive care, such as colon cancer screenings, mammograms, and pap smears
2,693	fewer Medicare beneficiaries would receive an unsafe medication
203	fewer premature deaths (before age 75) would occur from causes that are potentially treatable or preventable with timely and appropriate care
337	fewer hospital readmissions would occur among Medicare beneficiaries (age 65 and older)
4,538	fewer emergency department visits for nonemergent or primary-care-treatable conditions would occur among Medicare beneficiaries
40,700	fewer adults (ages 18–64) would have lost six or more teeth because of tooth decay, infection, or gum disease

Notes

(a) Ranks from the 2012 edition of the Local Scorecard have been revised to match methodology and measure definitions used in the 2016 edition.

(b) The Local Scorecard reports at the level of the Hospital Referral Region (HRR), an area representing the local market for health care services, defined by health care utilization patterns. HRR boundaries may differ from other commonly used region definitions (e.g., county or Metropolitan Statistical Areas).

(c) Improved or worsened denotes a change of at least one-half (0.5) of a standard deviation (a statistical measure of variation) larger than the indicator's distribution among all Hospital Referral Regions (HRRs) over the two time points. Little or No change denotes no change in rate or a change of less than one-half of a standard deviation.

(d) The table shows the estimated impact if this HRR's performance improved to the rate of the best-performing HRR for eight Scorecard indicators. Benchmark HRRs, those with the best rate, have an estimated impact of zero (0).

Adults ages 18–64 who report fair/poor health or activity limitations because of physical, mental, or emotional problems	2013/14	5	286	36%	33%	25%	13%	2011/12	38%	25%	No Change
Adults who smoke	2013/14	5	300	28%	27%	19%	7%	2011/12	30%	19%	No Change
Adults ages 18–64 who are obese (BMI >= 30)	2013/14	5	288	39%	34%	28%	14%	2011/12	37%	28%	No Change
Adults ages 18–64 who have lost six or more teeth because of tooth decay, infection, or gum disease	2012 & 2014	5	299	23%	22%	10%	2%	--	--	--	--

Table 1 Notes:

* Data for this area not available for this indicator.

-- Historical data not available or not comparable over time.

(1) Improved or worsened denotes a change of at least one-half (0.5) of a standard deviation (a statistical measure of variation) larger than the indicator's distribution among all Hospital Referral Regions (HRRs) over the two time points. No change denotes no change in rate or a change of less than one-half of a standard deviation.

(2) Values are the unweighted average of the region's hospitals' safety composite (PSI 90) score.
