Figure ES-3. Uninsured Are Least Likely to Have a Medical Home and Many Do Not Have a Regular Source of Care

Note: Medical home includes having a regular provider or place of care, reporting no difficulty contacting provider by phone or getting advice and medical care on weekends or evenings, and always or often finding office visits well organized and running on time.

* Compared with insured with income at or above 200% FPL, differences are statistically significant.

Source: Commonwealth Fund 2006 Health Care Quality Survey.
Figure ES-4. Racial and Ethnic Differences in Getting Needed Medical Care Are Eliminated When Adults Have Medical Homes

Percent of adults 18–64 reporting always getting care they need when they need it

- **Medical home**
- **Regular source of care, not a medical home**
- **No regular source of care/ER**

Note: Medical home includes having a regular provider or place of care, reporting no difficulty contacting provider by phone or getting advice and medical care on weekends or evenings, and always or often finding office visits well organized and running on time. Source: Commonwealth Fund 2006 Health Care Quality Survey.
Figure ES-5. When African Americans and Hispanics Have Medical Homes They Are Just as Likely as Whites to Receive Reminders for Preventive Care Visits

Percent of adults 18–64 receiving a reminder to schedule a preventive visit by doctors’ office

- Medical home
- Regular source of care, not a medical home
- No regular source of care/ER

Note: Medical home includes having a regular provider or place of care, reporting no difficulty contacting provider by phone or getting advice and medical care on weekends or evenings, and always or often finding office visits well organized and running on time.
Source: Commonwealth Fund 2006 Health Care Quality Survey.
Figure ES-6. Patients with Medical Homes—Whether Insured or Uninsured—are Most Likely to Receive Preventive Care Reminders

Percent of adults 18–64 receiving a reminder to schedule a preventive visit by doctor’s office

Note: Medical home includes having a regular provider or place of care, reporting no difficulty contacting provider by phone or getting advice and medical care on weekends or evenings, and always or often finding office visits well organized and running on time.

* Compared with medical home, differences are statistically significant.

Source: Commonwealth Fund 2006 Health Care Quality Survey.
Figure ES-7. Adults with a Medical Home Are More Likely to Report Checking Their Blood Pressure Regularly and Keeping It in Control

Percent of adults 18–64 with high blood pressure

- Does not check BP
- Checks BP, not controlled
- Checks BP, controlled

Note: Medical home includes having a regular provider or place of care, reporting no difficulty contacting provider by phone or getting advice and medical care on weekends or evenings, and always or often finding office visits well organized and running on time.
