**Figure 7. Coverage Gaps for Panels of Children
in Louisiana's Medicaid Program
January 1999–July 2007**

Percent of children with gaps

* These panels include the time, July 2006, when citizenship documentation rules were implemented.

Note: Each panel was followed for a two-year period. Panels included all children eligible in the beginning month who did not have coverage in the previous month and would not “age out” over the subsequent two years.

**Figure 13. Methods to Verify Citizenship for Children
in Washington's Public Insurance Programs
July 2006–June 2007**

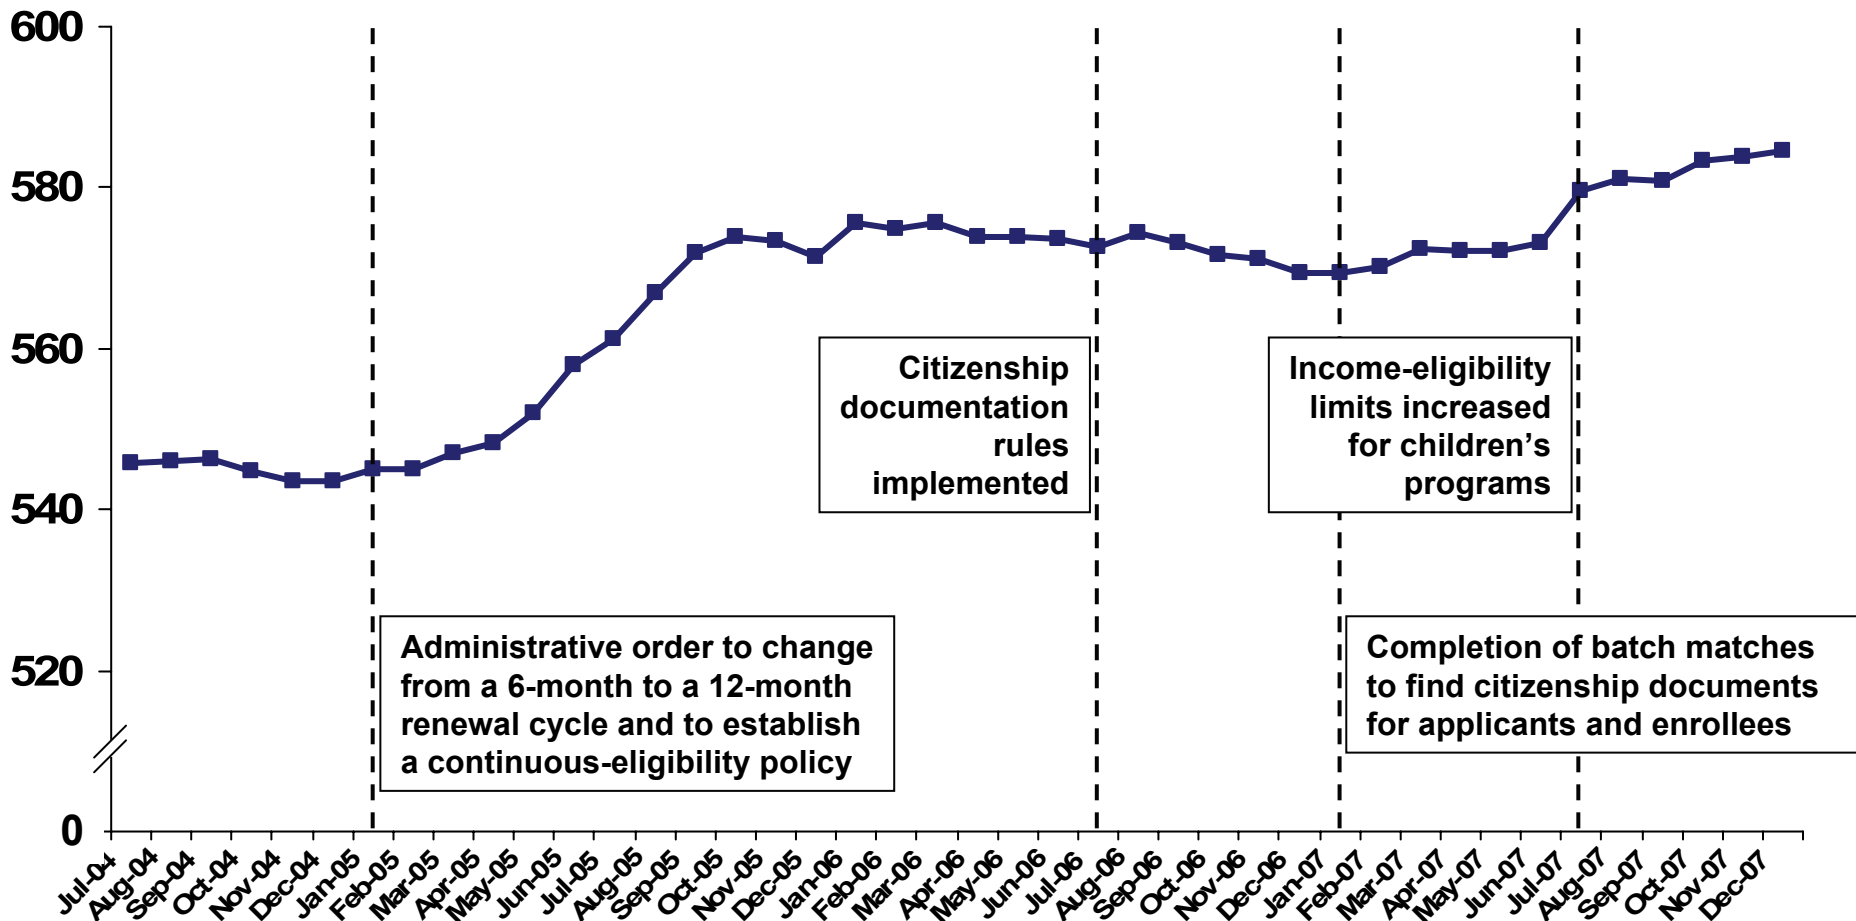

N = 449,265 verifications for applications and renewals.

Note: CMS has defined four levels, or tiers, of documents that can be used to prove citizenship, with preference given to the first two. Tier One is a U.S. passport, Certificate of Naturalization, or Certificate of U.S. Citizenship. Tier Two is a birth certificate or other specified record. Tier Three includes hospital, insurance, school, or religious records, and Tier Four specifies documents, as a last resort and subject to rigorous conditions, such as written affidavits. Documents to prove identity are also required for all but the first tier. Batch matches of birth certificates are considered the equivalent of Tier Two.
