Figure ES-1. Health Status and Employment

- **Employed (%):**
  - All persons ages 18–64: 76%
  - 25–36 mos. before: 75%
  - 13–24 mos. before: 79%
  - 1–12 mos. before: 64%
  - 1–12 mos. after: 92%
  - 13–24 mos. after: 91%
  - 25–36 mos. after: 92%

- **Limited in daily activities (%):**
  - All persons ages 18–64: 14%
  - 25–36 mos. before: 15%
  - 13–24 mos. before: 14%
  - 1–12 mos. before: 28%
  - 1–12 mos. after: 67%
  - 13–24 mos. after: 50%
  - 25–36 mos. after: 52%

- **Mean number of bed days in past 12 months:**
  - All persons ages 18–64: 5
  - 25–36 mos. before: 15
  - 13–24 mos. before: 14
  - 1–12 mos. before: 28
  - 1–12 mos. after: 15
  - 13–24 mos. after: 12
  - 25–36 mos. after: 11

Employed (%)
Limited in daily activities (%)
Mean number of bed days in past 12 months

Time Relative to SSDI Entry

All persons ages 18–64
25–36 mos. before
13–24 mos. before
1–12 mos. before
1–12 mos. after
13–24 mos. after
25–36 mos. after
Figure 2. Health Care Utilization Before and After SSDI Entry

- Mean number of doctor visits in past 12 mos.
- Mean short-stay hospital days in past 12 mos.

Source: Authors’ analysis.
Figure 3. Health Care Access Problems Before and After SSDI Entry

- Medical care delayed because of cost
- Needed care but not able to get it
- Lack of insurance/cost the reason did not get needed care
