**Notes:** This exhibit measures change from 2013 to 2015, the most recently available data year, except in the case of the dental indicator, for which the most recently available data year and comparable data year are 2014 and 2012.<sup>a</sup> For the purposes of this exhibit, we treat the District of Columbia as a state, creating a total of 51. “Improved” or “Worsened” refers to a change of at least 0.5 standard deviations between the two time periods. “Little or no change” includes states with changes of less than 0.5 standard deviations as well as states with no change or without sufficient data to assess change over time.<sup>b</sup> Improvement also occurred at the national level.<sup>c</sup> At-risk adults defined as all adults age 50 or older, or adults ages 18 to 49 in fair or poor health, or ever told they have diabetes or pre-diabetes, acute myocardial infarction, heart disease, stroke, or asthma.

---

Exhibit 3

Percent of Adults Ages 19–64 Uninsured, 2013, 2014, and 2015

Note: States are arranged in rank order based on their current data year (2015) value.

a At least a −0.5 standard deviation change (at least 3 percentage points) between 2014 and 2015.

b At least a −0.5 standard deviation change (at least 3 percentage points) between 2013 and 2015.

Exhibit 4

States that expanded Medicaid as of January 1, 2015

States that had not expanded Medicaid as of January 1, 2015

Notes: Low-income defined as living in a household with income <200% of the federal poverty level. States are arranged in rank order based on their current data year (2015) value. Alaska, Indiana, Louisiana, and Montana expanded their Medicaid programs after January 1, 2015.

Exhibit 5

Percent of Children Ages 0–18 Uninsured, 2013, 2014, and 2015

a At least a −0.5 standard deviation change (at least 2 percentage points) between 2014 and 2015.
b At least a −0.5 standard deviation change (at least 2 percentage points) between 2013 and 2015.

Exhibit 6
Percent of Adults Who Went Without Care Because of Costs, 2013, 2014, and 2015

Note: States are arranged in rank order based on their current data year (2015) value.

at least -0.5 standard deviation change (at least 2 percentage points) between 2014 and 2015.

at least -0.5 standard deviation change (at least 2 percentage points) between 2013 and 2015.

Black and Hispanic Adults Made Significant Coverage Gains Under the Affordable Care Act, but Wide State Variation Persists
