

How well does the health care system in Utah

work for people of different racial and ethnic groups?

In Utah, **White people** experienced the **highest health system performance**, scoring in the 88th percentile among all population groups nationally.

Hispanic people experienced the **lowest health system performance** in the state, scoring in the 19th percentile.

Compared to other states in the Rocky Mountain region, Utah has more severe racial and ethnic health disparities.

Health System Performance by Race/Ethnicity

Each column is a racial/ethnic group, and each point represents a state. Performance represented as percentiles (1–100). Utah performance percentile highlighted. No highlighted dot indicates overall performance data not available for that group.

Population by race/ethnicity (2022)

	Utah	Rocky Mountain	United States
Total	3,354,936	12,687,430	328,403,052
AANHPI	123,693 (4%)	350,276 (3%)	19,862,655 (6%)
AIAN	22,576 (<1%)	126,971 (1%)	1,688,543 (<1%)
Black	32,109 (<1%)	258,779 (2%)	38,460,950 (12%)
Hispanic	507,977 (15%)	2,169,783 (17%)	62,818,758 (19%)
White	2,537,534 (76%)	9,181,432 (72%)	189,511,136 (58%)

Notes: AANHPI = Asian American, Native Hawaiian, and Pacific Islander. AIAN = American Indian and Alaska Native. “—” means data not available. Rocky Mountain states include CO, ID, MT, UT, WY. How well does the health system in Utah work for people from different racial and ethnic groups, and across different dimensions of care?

AANHPI

Utah ranks 27th of 31 states where calculation was possible, indicating health system performance for AANHPI people in the state was among the worst compared to other states. Specifically:

- Health outcomes ranking: **29** (of 33) is among the worst
- Health care access ranking: **28** (of 34) is worse than average
- Health care quality ranking: **21** (of 41) is worse than average

AIAN

An overall ranking for AIAN people in Utah is not available because of insufficient data.

- Health outcomes ranking: insufficient data
- Health care access ranking: insufficient data
- Health care quality ranking: insufficient data

Black

An overall ranking for Black people in Utah is not available because of insufficient data.

- Health outcomes ranking: insufficient data
- Health care access ranking: insufficient data
- Health care quality ranking: insufficient data

Hispanic

Utah ranks 33rd of 47 states where calculation was possible, indicating health system performance for Hispanic people in the state was worse than average compared to other states. Specifically:

- Health outcomes ranking: **15** (of 49) is better than average
- Health care access ranking: **36** (of 48) is worse than average
- Health care quality ranking: **30** (of 48) is worse than average

White

Utah ranks 12th of 51 states where calculation was possible, indicating health system performance for white people in the state was better than average compared to other states. Specifically:

- Health outcomes ranking: **3** (of 51) is among the best
- Health care access ranking: **31** (of 51) is worse than average
- Health care quality ranking: **10** (of 51) is better than average
